Description of Component Activities Including Number of Transactions Performed in Fiscal Year

The 167 branch offices funded in the Customer Delivery Services component process a variety of transactions, which impact the Michigan Transportation Fund in varying degrees. Registration fees constitute the bulk of revenue collected by Department of State branch offices. In FY04, fees were collected on 10 million motor vehicle registrations and 3.2 million title transactions. These transactions contributed to the \$998.6 million in MDOT revenue collected by MDOS.

Additional handling of the branch office transactions takes place in the Department's internal processing area where central title and registration computer records are maintained. Vehicle owners also have the option of renewing their registrations by mail, Internet or phone, rather than through the branch office. Many special plates such as personalized plates, are issued from the internal processing area.

The registration of vehicles provides several benefits including the following:

- The requirement for registration compels owners to comply with the provisions of the title law. Without the registration requirement, there would be no incentive to transfer a title and pay use tax.
- Vehicle registration fees provide a source of revenue for road maintenance and repairs.
- The requirement of displaying a license plate provides a mechanism for law enforcement agencies to readily identify vehicles with their corresponding ownership record.

Titles provide the following benefits:

- Serve as a proof of ownership document, including vehicle liability source.
- Provide a means for lending institutions to protect their security interest.
- Serve as a transfer document to convey ownership.

Explanation of Lapse

There was no lapse of Michigan Transportation Fund revenue.
